WORK EXPERIENCE
FLUTTER DEVELOPER

CRON24 TECHNOLOGIES   NOV-2023 - JAN2025

Developed and implemented a user-friendly mobile application using the Flutter framework.

- Integrated third-party APIs, libraries, and services, including **GraphQL** and **Firebase** and **payment gateways**, to enhance app capabilities and streamline backend operations.
- Stayed updated with the latest Flutter and Dart technologies , tools, **widgets** and best practices.
- Implemented intuitive **UI/UX** elements to optimize usability and navigation throughout the application.
- Collaborating with senior developers to implement new features and resolve technical issues.
- Proficient in writing well-documented and clean code to ensure maintainability and readability.
- Utilized **GetX** , **Provider** for state management to improve app performance and reduce complexity.

SKILLS

Dart / Flutter
State Management
GetX / Provider
RESTful APIs
Firebase
GraphQL
UI/UX Design

PROJECTS

I worked on 9+ projects using Flutter, Firebase, and APIs. I integrated various payment gateways such as Stripe, Razorpay, Flutterwave, and PayPal, along with Google Maps for live location tracking. Notably, I single-handedly developed 4 of these projects.
Hyra (Airbnb Clone) , Order trabajo (task/work management) ,
SavoryEats (Swiggy , Zomoto Clone) Users ,Store , Driver ,
Madurai Connect , Handyman , Cosmetics App (Laloo) ,
Netanation – connects citizens with local politicians , Cabby driver & rider (Uber clone)
In these projects, I handled end-to-end app development, including booking systems, real-time tracking, dynamic menus, and e-commerce features, with a focus on creating user-friendly UI. I also have experience in handling Google Play Store and App Store deployments.
